DTF guidelines revision & monitoring report introduction

Introduction of the two stage approval procedure:

1. The first stage: the WB and the DS are scoring the project proposal according to the quality, Roma participation and relevance (link to the DAPs as well as cross-country relevance)

2. The Second stage: Proposals ranked above 5 points under the first review process are sent via email for no-objection to the entire ISC (including government delegates and representatives of Roma civil society).

Reporting form:

- Introducing monitoring report to be filled out by DTF Applicants after completion of their proposal. This reporting tool is supported by World Bank Management in order to follow-up progress of the Bank-executed DTF. It would also give us critical data information on DTF impact.
DTF guidelines revision & monitoring report introduction (continued)

Rationale behind these changes:

1. **DTF Guidelines:**

   - Complaints from Decade Coordinators regarding the quality and relevance of the proposals financed under the DTF. Therefore there is a need to increase the quality of the proposal and tighten/improve the review process.

2. **Monitoring report:**

   - There is no concrete follow-up on the output/outcome of DTF proposals once completed. This reporting tool would give us critical data information on DTF impact and activities financed. Reports would be compiled and shared with Decade Coordinators and during each ISC Meeting.
