Signed in Podgorica, on 13th October 2008, by :

- **NATIONAL ROMA COUNCIL OF MONTENEGRO,**
- **NGO „COALITION ROMA CIRCLE”,**
- **STATISTICS INSTITUTE OF MONTENEGRO- MONSTAT**

# AGREEMENT ON CO-OPERATION IN THE IMPLEMENTATION OF PROJECT „DATABASE DESIGN ON RAE POPULATION”

## Article 3

The time-frame for the execution of data collection in the field is commencing on 20<sup>th</sup> October 2008 at 9 a.m., when the points are opening, and finishing on 29<sup>th</sup> October 2008 at 5 p.m. The public campaign shall be conducted in the period from 18<sup>th</sup> October 2008 at 8 a.m. to 27<sup>th</sup> October 2008 at 4 p.m.

## Article 4

According to the project, MONSTAT has cooperated with the Coalition and the Council in the following execution phases:

- public campaign;
- data collection.

# Database Design for RAE Population

## ❖ Project promotion

- NGO sector, National Roma Council and individuals have participated in project promotion by informing the target population on the importance, significance, terms and deadlines for data collection and providing other relevant information regarding the data collection activity in particular.

# Database Design for RAE Population

## ❖ Data Collection

- For the requirements of this phase, representatives of the Statistical Institute and representatives of RAE population in consultation with the NGO sector and the National Roma Council were distributed at the interview points.
- Monitoring of the survey and the guidance of the interviewers was conducted by controllers and supervisors of MONSTAT, National Roma Council and Coalition Roma Circle.

## Database Design for RAE Population- Data Collection

Municipality	Total number of points
Bar	5

Herceg Novi	3
Kotor	1
Niksic	4
Pljevlja	1
Podgorica	21
Rozaje	2
Tivat	4
Ulcinj	2
<b>Total</b>	<b>53</b>

# Database Design for RAE Population

## Data Collection - participants

Participants	Representatives	
	MONSTAT	RAE /Coalition Roma Circle and National Roma Council
Supervisors	1	2
Controlers	4	6
Interviewers and animators (promotion campaign in the field phase)	46	103
<b>TOTAL</b>	<b>51</b>	<b>111</b>

# Database Design for RAE Population

## ❖ Application Design for Data Input

- The input of data, i.e. data collected by the survey, was conducted via special application designed particularly for the requirements of the survey by the Statistical Institute's IT team.

# Database Design for RAE Population

## ❖ Control and Data Processing

- MONSTAT has carried out the control and data processing by using software usually employed for statistics analysis purposes. The processing comprised table and graphical display of all results (in absolute values and percentages), also designing indicators for individual questions from the questionnaire.
- Following control and data processing, the results shall be presented to the principal of this project, aimed at obtaining recommendations and comments for finalizing of the report.

# Database Design for RAE Population

## ❖ Creation of Final Report

- The survey result of „Database Design for RAE Population” shall be a final report (table set), i.e. publication with principal survey results and created database with main information on the RAE population.
